Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

SAYS

- Which sports and regions give us the most medals for the athletes we send?
- Which countries are the efficient ones, not just the big ones?
- I need one clear view of our Olympic performance.

THINKS

- Are we investing in the right sport categories?
- How do the leading nations compare with us over 18 Games?
- Spreadsheets of medal tables hide the trends.

MICHAEL TURNER

(Performance Director, National Olympic Committee)

DOES

- Tracks medals, athletes sent and medal efficiency for every Games.
- Benchmarks our results against other nations and regions.
- Presents findings to the board before the next Games.

FEELS

- Pressured to justify team size and funding.
- Frustrated when data is scattered across files.
- Confident when results are clear, visual and interactive.

SAYS

- Does higher sports investment really lead to more medals?
- How does hosting the Games change a country's medal count?
- I need evidence before I approve the budget.

THINKS

- Which regions get the most return per athlete?
- Are Low and Medium investment countries still competitive?
- Manual comparison across years is slow and can miss insights.

SOFIA MARTINEZ

(Sports Funding Officer, National Sports Ministry)

DOES

- Reviews investment levels against medal results by country.
- Compares host and non-host performance across Games.
- Recommends funding by sport category and region.

FEELS

- Under pressure to give defensible budget advice.
- Concerned that investment and medal data are not connected.
- Confident when the numbers support the decision.

SAYS

- How many medals does an average athlete win in each sport category?
- Which seasons, Summer or Winter, show higher efficiency?
- Findings need clear, filterable visuals, not raw tables.

THINKS

- Which sport categories give the best medals per athlete?
- How do regions differ in efficiency and participation?
- Is the trend in medals awarded changing over time?

DR. AISHA KHAN

(Sports Data Analyst, University Research Centre)

DOES

- Studies athlete data across 21 sport categories.
- Analyses medal trends from 1992 to 2026.
- Shares dashboards and stories with students and journalists.

FEELS

- Motivated by finding patterns in global sport.
- Concerned when metrics are scattered and hard to compare.
- Confident when one dashboard answers many questions.
